JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

Bulletins I and II of the Philippine Museum. Bulletin I, on Birds from Luzon, Mindoro, Masbate, Ticao, Cuyo, Culion, Cagayan, Sulu, and Palawan. By Richard C. McGregor.

"This paper is the first of a proposed series of reports on collections made for the Philippine Museum, an institution established by and act of the Philippine Commission. It summarizes the more important results of: (1) Five weeks' collecting at Mariveles, Bataan Province, Luzon; (2) various two-day trips about Manila; (3) three months in Ticao and Masbate; (4) a hurried visit to the Islands of Mindoro, Cuyo, Culion, Cagayan Sulu, and Palawan.

"But one of the species obtained appears to be new. The discovery, near Manila, of the males of Grant's two Luzon Orioles and the extension of the range of *Cinnyris whiteheadi* are most interesting."

"The work has been directed by Commissioner Dean C. Worcester, Secretary of the Interior, to whom the author is indebted for the use of books and assistance in many ways."

Six species new to the Philippines, one wholly new species, and the description of four hitherto unknown plumages, form the most interesting part of the paper to the general reader. New localities of upwards of 135 species are also given, indicating that a great amount of work is being done in that little known archipelago.
